

Table C13. Percentage recoveries of the surrogate internal standard, o-terphenyl from mussels from Sandy Hook Bay.^{1,2}

<u>Sample ID</u>	<u>Batch No</u>	<u>Percent Recovery</u>
297031710	2	135
297031711	2	142
297031712	2	130
297031713	2	136
297031714	2	128
297031715	2	131
297031716	2	134

¹ The values of the recoveries for the surrogate internal standards were determined using internal standard calculations.

² Each of these mussel samples is an individual, non-depurated, ribbed mussel taken from Sandy Hook Bay on February 20, 1997.
