

# NOAA FISHERIES

## Informal Public Discussion: Results of the 2013 Georges Bank Transboundary Fishery Stock Assessments

Updates for Georges Bank yellowtail flounder,  
Eastern Georges Bank haddock and cod

### Please Join Us Monday, August 12

- WHO:** NOAA Fisheries Service Northeast Fisheries Science Center fishery researchers and science leadership, other knowledgeable researchers
- WHAT:** It's a chance to talk informally about likely condition of all three stocks shared with Canada, and the challenges of predicting the future for yellowtail flounder in particular. Scientists and NOAA Fisheries Service leaders from the region will be on hand to talk about upcoming special flatfish surveys, a recent international stock assessment workshop that took on the yellowtail assessment, and the next steps for using the results in fishery management.
- WHERE:** New Bedford Free Public Library (Main Library)  
613 Pleasant Street, New Bedford MA
- WHEN:** Monday, August 12, 10-11:30 AM
- GOAL :** Understanding among fishermen and researchers about scientific information available on these three stocks and next steps for using it in fishery management
