

Table 5. Confirmed human-caused mortality and serious injury records of Western North Atlantic right whales (*Eubalaena glacialis*), 2006 - 2010.

Date ^a	Report Type	Age, Sex, ID, Length	Location ^a	Assigned Cause: P=primary, S=secondary		Notes/Observations
				Vessel Strike	Entanglement/ Fishery interaction	
1/10/2006	mortality	Calf Male 5.4m w/out fluke	Jacksonville, FL	P		Propeller lacerations associated with hemorrhaging and edema; flukes completely severed
1/22/2006	mortality	Calf Female ^b 5.6m	off Ponte Vedra Beach, FL		P	Significant premortem lesions from entanglement in apparent monofilament netting; no gear present
3/11/2006	serious injury	Yearling Male #3522	Off Cumberland Island, GA	P		11 propeller lacerations across dorsal surface
7/24/2006	mortality	age unknown Female 9.6m	Campobello Island, NB	P		Propeller lacerations through blubber, into muscle and ribs
8/24/2006	mortality	Adult Female 14.7m	Roseway Basin, NS	P		16 fractured vertebrae; dorsal blubber bruise from head to genital region
12/30/2006	mortality	Yearling Male #3508 12.6m	off Brunswick, GA	P		20 propeller lacerations along right side of head and back with associated hemorrhaging
3/31/2007	mortality	Calf Male 7.7m	Outer Banks, NC		P	Edema associated with flipper and dorsal & ventral thoracic musculature; epidermal abrasion indicated entangling body and flipper wraps; no gear recovered
<p>a. The date sighted and location provided in the table are not necessarily when or where the serious injury or mortality occurred; rather, this information indicates when and where the whale was first reported beached, entangled, or injured.</p> <p>b. Additional information on previous event that was not included in previous reports.</p> <p>c. Additional event not included in previous reports.</p>						

Table 5, continued. Confirmed human-caused mortality and serious injury records of Western North Atlantic right whales (*Eubalaena glacialis*), 2006 - 2010.

Date ^a	Report Type	Age, Sex, ID, Length	Location ^a	Assigned Cause: P=primary, S=secondary		Notes/Observations
				Vessel Strike	Entanglement/ Fishery interaction	
9/24/2008 ^c	serious injury	Adult Male #2110	Jeffreys Ledge	S	P	Spinal scoliosis associated with fresh entanglement injuries; compromised pectorals; emaciated; heavy cyamid load; pale skin; healed lacerations from previously documented vessel strike injury potentially exacerbate scoliosis; no gear present
1/14/2009	serious injury	Juvenile sex unknown #3311	off Brunswick, GA		P	Partial disentanglement; embedded wrap in rostrum & lip removed; decline in health; fixed trap/pot gear
1/27/2009	serious injury	Juvenile Male #3710 9.8m	Cape Lookout Shoals, NC		P	Live stranded w/ spinal scoliosis; euthanized; necropsy determined scoliosis due to entanglement and not congenital; entanglement wounds chronically infected; no gear recovered
6/27/2010	mortality	Adult Male	off Cape May, NJ		P	Evidence of constricting rostrum, mouth & flipper wraps w/ associated hemorrhage and bone damage; no gear recovered
7/2/2010	mortality	Calf Male 7.9m	off Great Wass Island, ME	P		2 large lacerations from dorsal to ventral surface
8/12/2010	mortality	Adult Male 14.1m	Digby Neck, NS		P	Evidence of entanglement with associated hemorrhaging around right flipper; no gear present
9/10/2010	serious injury	Adult Female #1503	off Cape Ann, MA		P	Constricting rostrum wrap; evidence of health decline; no gear recovered
12/25/2010	serious injury	Juvenile Female #3911	off Jacksonville, FL		P	Embedded line in mouth and on flipper; severe health decline; acute cause of death was shark predation; fixed trap/pot gear

a. The date sighted and location provided in the table are not necessarily when or where the serious injury or mortality occurred; rather, this information indicates when and where the whale was first reported beached, entangled, or injured.

b. Additional information on previous event that was not included in previous reports.

c. Additional event not included in previous reports.
