

## 2016 NOAA Aquaculture Science Review

During the last two weeks of July 2016 the NOAA Office of Aquaculture is conducting a review of the NOAA aquaculture science programs carried out at NOAA Science Centers. Led by an independent review panel of experienced aquaculture scientists, the review will be split into two sessions. The first public session will take place in Milford, CT (July 19-20) and will cover recent aquaculture science conducted at the NOAA Science Centers in the eastern half of the US. The second public session will take place in Seattle, WA (July 26-27) and will cover aquaculture science from the Centers in the western half of the US. The review meetings will include presentations by NOAA scientists to the review panel. You are invited to view the presentations via a web broadcast (details below). Web viewers will be also be able to submit comments addressing the same questions being asked of the review panel by using the link provided at the end of this document. Note that anonymous comments will not be considered. Your identity will be associated with your submission and this information will be publicly available.

If you wish to join the online audience, please follow the login instructions below:
